Environmental Policy Statement

Light Perceptions Limited is committed to achieving the highest standards of environmental performance throughout all of its business activities and recognises its responsibility to the environment.

Light Perceptions Limited recognises that its activities have both direct and indirect environmental impact and aims to minimise that impact through the responsible specification of products and systems and the management of the projects in which it is involved.

Light Perceptions Limited will therefore, so far as is reasonably practicable:

- Ensure environmental risks are properly identified, prioritised and managed in an appropriate and timely way.
- Establish sound environmental management policies and promote best practice.
- Manage its activities in ways that are environmentally sustainable and economically feasible, by making efficient and environmentally responsible use of energy and other resources and exploiting all commercially viable opportunities to maximise efficiency.
- Minimise environmental impact and reduce or, where practicable, prevent pollution.
- Minimise waste production by reduced consumption and develop effective waste management and recycling procedures.
- Ensure that it purchases goods and materials which comply fully with UK government and EU legislation and recognised environmental best practice
- Collaborate with clients, co-designers, manufacturers and contractors to promote environmentally responsible procurement of goods and services.
- Understand the sensitivities of its clients, including the pressures of growing and changing statutory and public concern about environmental issues, and assist them in complying with environmental best practice.
